This powerful 3103 son combines all the characteristics we are looking for in genetics that can perform on the ranch and in the carcass. A highly linebred bull that traces to Rito 149 and Rito 707, his maternal genetics are loaded with the Bonanza bloodline that has worked so well. Famous ancestors include EXT, F0203, Emulation 31, and a heavy dose of Vye Angus genetics. AM Free.
